

**Official release**

Pozzolo Formigaro, 1st July 2010

In order to answer the several questions we are getting from players and their associations, to clarify doubts and stop rumours on our balls and football tables, we wish to inform as follows:

- 1) The development process on our ITSF ball Speed Play has been concluded. No further modifications will be introduced.
- 2) Upon a request of ITSF and TFBÖ, Garlando is now working on the High Control ball. Following the suggestions of Wolfgang Reszler, spokesperson for this matter for TFBÖ and ITSF, we have introduced modifications to the ball surface to make it less rough.
- 3) A few samples of this modified ball have been sent to TFBÖ for testing.
- 4) If the test results turn up to be satisfactory, Garlando will consider modifying the ball diameter.
- 5) Further information on the High Control ball development will be given directly by Garlando as soon as available.
- 6) No modifications of any sort will be made to our ITSF football table World Champion. The World champion version which will go on being used for all tournaments is the one released in 2007 and currently on sale.

The Management.

Garlando spa
